Shop locally keep your town alive

People don't like losing shops and services in towns and villages, but don't equate this to how they spend their money.

Shops will only survive if customers spend locally. So if you want a vibrant town centre where people can socialise as well as shop, shop locally!

Shop locally keep Barrhead individual

Many town centres in Britain look the same with franchises and multinationals. Independent shops create distinctive shopping experiences and stock different products.

Independent shops keep traditional local products alive.

They respond more quickly to the needs of local customers, stocking products to meet the changing population needs.

Shop locally keep your money in the local area

Research suggests that a pound spent with a local business stays in the local economy for five more transactions.

A pound spent with a national business operating locally stays in the local economy for just two transactions.

If you buy your goods from businesses that themselves source their products locally, this ensures the money is re-spent locally, helping to strengthen the local economy.

Businesses in our town centres and villages create local employment and self-employment. These people in turn spend in the local economy.

Shop Barrhead is a campaign supported by the Go Barrhead project funded by the Scottish Government's Smarter Choices Smarter Places Initiative.
