Newton Mearns South	9721	65.65	3.37	18.66	0.78	1.67	2.57	7.29

1. The living arrangements variable is different to marital status. It combines information from both marital status and the relationship matrix. Therefore a person living as part of a 'cohabiting couple' could in fact be married (to someone else) but will not appear as married or separated in this classification.

2. A person not living in a couple can be classified married (or re-married) if they denote their marital status as married (or re-married) but have no spouse or partner resident in the household.

Table KS04 Marital Status  
Table population: All people aged 16 and over  
Geographical level: 2007 Ward

	All people aged 16 and over	% people aged 16 and over Single (never married)	% people aged 16 and over Married	% people aged 16 and over Re-married	% people aged 16 and over Separated (but still legally married)	% people aged 16 and over Divorced	% people aged 16 and over Widowed

1 Limiting long-term illness covers any long-term illness health problem or disability which limits daily activities or work.

2 Working age population is 16 - 64 inclusive for men and 16 - 59 inclusive for women.

3 General health refers to health over the 12 months prior to Census day (29 April 2001).

4 Provision of unpaid care: looking after giving help or support to family members friends neighbours or others because of long-term physical or mental ill-health or disability or problems relating to old age.

Table KS09a Economic Activity
