CONSULTATIONS/COMMENTS:

East Renfrewshire Council Roads And Transportation Service	No objections.
Giffnock Community Council	Supports the campsite in principle. Requests adequate steps are taken to protect the amenity of local residents from noise, traffic, smells and possible anti-social behaviour.
East Renfrewshire Council Environmental Health Service	Recommends conditions restricting the playing of amplified music and when the campsite infrastructure is to be constructed/dismantled.
East Renfrewshire Council Property and Technical Services	No objection to this application from an Estates perspective, however, the applicant will have to secure landlord's consent from the Council in its role as landlord, before it could proceed with this temporary use.

Ann Archibald 83 Braidholm Road Giffnock G46 6EA

Representations can be summarised as follows:

Objections

Contrary to local plan

Noise

Light pollution

Impact on parking/traffic

Not a suitable location/campsite too large

Loss of privacy

Hygiene/odour from toilets/littering
Use of clubhouse
Potential anti-social behaviour
Contamination
Number of tents/campers excessive
Tickets have already been sold for the campsite before permission has been granted

In support

Associated with the Commonwealth Games which is a once in a lifetime event for Glasgow
Will bring in some noise and colour which is considered not to be a bad thing
Boost for local economy

DEVELOPMENT PLAN & GOVERNMENT GUIDANCE: See Appendix 1

SUPPORTING REPORTS: No reports have been submitted for consideration as part of this application.

ASSESSMENT:

This is a local development under the terms of the Town and Country Planning (Hierarchy of Developments) (Scotland) Regulations 2009. However as more than 10 objections have been received to the application it has to be presented to the Planning Applications Committee for determination.

Permission is sought to form a temporary campsite in the GHA Rugby Club at Braidholm Road, Giffnock. The campsite is to be formed between 19th July 2014 and 9th August 2014 and is in association with the Commonwealth Games occurring in Glasgow between 23rd July and 3rd August.

The campsite is intended to provide accommodation for contractors/volunteers at the games as well as spectators. The campsite is to be formed on two of the pitches at this location (identified as pitch no.2 and no.3) and the submitted plans show ancillary facilities being provided on site such as a catering tent and temporary toilets. The catering tent is shown adjacent to the clubhouse whereas the toilets are shown between the two pitches. The applicant has indicated that the maximum number of people that are to be at the campsite is 600 with the maximum number of tents being 250.

The applicant has confirmed that no modular units, such as sheds or lodges, are to be provided but only tents. The facilities in the existing clubhouse are intended to be used as well whereas the catering tent is to be available for the contractors. The applicant has also indicated no outside music or entertainment is planned.

Tents are to be provided for the contractors whereas the public will use a mix of provided tents and will also be able to bring their own. The area where the contractors are to be accommodated is to be segregated from where the public will camp. The applicant has indicated that the number of workforce contractors is difficult to gauge as contracts for the games had not yet been awarded by the organising committee at the time of the submission of the application. However for the contractors and volunteers the area adjacent to the neighbouring Braidholm Sports Ground is to be the first area where tents are pitched.

Temporary fencing is to be erected to create an entrance and check in area and it has been indicated that there are strict check in times for visitors who have booked into the campsite with none before 9am or after 9pm. The spaces between and around the pitches are intended to be the pedestrian walkways but it has not been indicated whether any surfacing materials are to be laid.

The existing car park is also intended to be utilised for parking and there are no intentions to form an overflow car park because there are public transport routes nearby.

The application has to be assessed against the development plan as well as any material planning considerations. The rugby club and the adjacent Braidholm Sports Ground is covered by Policy L1 of the adopted East Renfrewshire Local Plan which aims to safeguard important urban green spaces and will resist development which would prejudice their continued leisure and recreational use or amenity or wildlife value. Development will only be acceptable in such areas only in very exceptional circumstances, where the benefits outweigh the cost of loss of greenspace and provided that the leisure, recreational use, amenity or wildlife value is not significantly prejudiced.

In the proposed Local Development Plan (LDP) the rugby club and adjacent sports ground are again identified as important urban greenspace covered by Policy D5. Policy D5 again indicates that urban greenspace will be safeguarded. Proposals which would result in the loss of important urban greenspace will be resisted unless it can be demonstrated that there is no significant adverse impact on the landscape character and amenity of the site and surrounding area; there will be no loss of public access; there will be no or limited impact on nature conservation; the loss will result in a community use, the benefit of which would outweigh the loss.

Although the proposed campsite would result in the loss of the playing fields for a temporary period it should be noted that the campsite is to be formed during the off season when the rugby pitches are not in use. Following the dismantling of the campsite this location will revert back to its normal use as rugby pitches. This type of facility had been provided by the applicant at the Olympic Games in London in 2012.

With regard to the objections that have been received the following comments are made.

Contrary to Local Plan: the proposed campsite is a departure from the Local Plan policies however as indicated above the campsite is to be at this location for a relatively short period of time during the rugby off season.

Noise disturbance: The Council's Environmental Health Service has not objected to the application on the basis of potential noise disturbance however has recommended conditions that do not allow amplified music to be played and that restrictions be placed on when the campsite infrastructure may be constructed/dismantled to minimise noise nuisance to nearby residents. If the application is approved it is intended to attach these conditions.

Light Pollution: the applicant has indicated that the campsite will not be illuminated at night. Although they may use one of the existing floodlights which points at the entrance way but this will not be on beyond 11pm. A path way may be illuminated but this will be done with LED solar lights situated 1m off the ground and pointing at the ground with very low light spread.

Impact on parking/traffic: The Council's Roads Service has been consulted on the application and is satisfied that there is adequate parking available to accommodate the facility and has no objections to the application.

Not a suitable location in a residential area/campsite too large: although the application site is relatively large the site is located within an expansive area of land used for recreational and leisure purposes.

Loss of privacy: it is not considered that the campsite will result in a loss of privacy because of where the tents are to be located in relationship to existing residential properties outwith the site.

Hygiene/odour from toilets/littering: it is the responsibility of the applicant to manage the day-to-day running of the campsite and to provide the relevant facilities to do so. The applicant has indicated that the temporary toilets are to be cleaned/emptied on a regular basis.

Potential anti-social behaviour: this is not a matter that can be considered in the determination of this application. The responsibility to deal with any anti-social behaviour that may occur lies with the police. The applicant has also indicated that their own staff will be present 24 hours on site and security is also to be provided.

Use of clubhouse: the use of the clubhouse facilities for the duration of the campsite is not considered to be a significant issue and negates the requirement to provide other temporary buildings on site (such as shower facilities). However the GHA has a club premises licence which allows members of the club or those signed in by a member to use the bar facilities. The applicant will have to apply separately for an occasional licence to allow public access during this period.

Contamination: the Council's Environmental Health Service has indicated that the rugby pitches at this location would not be considered as contaminated land.

Numbers of tents and campers: the applicant has indicated that the maximum number of campers on site is to be 600 and not in excess of 2500 as one objector has suggested.

Tickets have already been sold for the campsite before permission has been granted: this is not a material consideration in the determination of this application. If tickets have been sold at this time this is a commercial decision by the applicant over which the Council has no control.

Conclusion

The proposed campsite is technically a departure from the development plan as it results in the loss of leisure and recreational land. However this campsite is not to be at this location on a permanent basis and this loss is for a relatively short time period during the off season after which the playing fields will revert back to their normal use. It is therefore not considered that this loss is significant in terms of its duration. In addition the rugby club is located adjacent to other leisure uses which are not affected by the proposed campsite. The principle of the campsite use is considered acceptable. Planning conditions are also considered necessary to be attached in order to lessen the impact of the campsite on nearby residential properties.

RECOMMENDATION: Approve Subject to Conditions

PLANNING OBLIGATIONS: None

CONDITION(S):

1. All structures associated with the use of the campsite hereby approved (tents, portable toilets, temporary fencing, surfacing materials, lights, etc) shall be completely removed from site by 10 August 2014 unless otherwise agreed in writing by the Head of Environment (Planning, Property and Regeneration).

Reason: To ensure the site reverts back to playing fields by the end of the period of consent for the campsite.

2. Prior to the campsite being formed and brought into use the exact location of all associated structures (such as the catering tent, portable toilets, temporary fencing, surfacing materials, etc) shall be submitted for the further approval in writing by the Head of Environment (Planning, Property and Regeneration).

Reason: To ensure the location of the structures is acceptable.

3. For the avoidance of doubt the position of the catering tent in the car park adjacent to the clubhouse as indicated on the approved drawings does not form part of this consent. At the same time as the submission of the information required by condition 2 above an alternative location for the catering tent shall be submitted for the further approval in writing by the Head of Environment (Planning, Property and Regeneration).

Reason: To ensure the location of the catering tent is acceptable.

4. For the avoidance of doubt no tents or other temporary structures associated with the use of the campsite hereby approved shall be located within 30 metres of the south

boundary of the application site unless otherwise agreed in writing by the Head of Environment (Planning, Property and Regeneration).

Reason: On order to lessen disturbance to nearby residential properties.

5. There shall be no construction or dismantling works or offloading/loading of materials and structures associated with the use of the campsite prior to 8am or after 8pm unless otherwise agreed in writing by the Head of Environment (Planning, Property and Regeneration).

Reason: To protect nearby residential properties from noise/disturbance.

6. No amplified music shall be played at any time during the duration of the campsite hereby approved.

Reason: To protect nearby residential properties from noise/disturbance.

7. The rugby club clubhouse shall not be used in association with the campsite after 11pm.

Reason: To protect nearby residential properties from noise/disturbance.

ADDITIONAL NOTES:

The applicant is reminded that the consent of the landowner is also required before the approved development is carried out.

The applicant is reminded that a separate licence may be required for the use of the GHA clubhouse.

The applicant is required to consult East Renfrewshire Council Protective Services regarding compliance with the provisions of the Health & Safety at Work Etc Act 1974 and the Food Safety Act 1990.

ADDED VALUE:

Conditions have been added that are necessary to control or enhance the development and to ensure the proposal complies with the Council's Local Plan policies.

BACKGROUND PAPERS:

Any background papers referred to in this report can be viewed at www.ercplanning.eastrenfrewshire.gov.uk/eplanning, where you can enter the Reference Number listed below. Any further information can be obtained from Mr Sean McDaid on 0141 577 3339.

DIRECTOR OF ENVIRONMENT

DEVELOPMENT PLAN:

Strategic Development Plan

This proposal raises no strategic issues in terms of the Glasgow and the Clyde Valley Strategic Development Plan and therefore the East Renfrewshire Local Plan is the relevant policy document

East Renfrewshire Local Plan (Adopted 14th February 2011)

Policy L1

The Council will safeguard the important urban Greenspaces and wider green network identified on the Proposals Map and will resist development which would prejudice their continued leisure and recreational use or amenity or wildlife value.

Policy DM1

Detailed Guidance for all Development

Where the principle of development is deemed to be acceptable in terms of the other Policies contained within this

Local Plan, proposals for development will require to conform to the appropriate criteria below:

1. Not result in a significant loss of character or amenity to the surrounding area.
2. Be of a size, scale and density in keeping with the buildings in the locality and respect local architecture, building form, design, and materials.
3. Not constitute backland development without a road frontage.
4. Not impact adversely on the landscape character, involve a significant loss of trees or other Important landscape, greenspace or biodiversity features (see Policies E3 - "Protection of Natural Features", E6 - "Biodiversity" L1 - "Protection of Important Urban Greenspace", and L2- "Safeguarding the Local Greenspace Resource".
5. Ensure that landscaping is an integral element in layout design, taking account of existing physical features (e.g. trees, hedgerows, walls, etc.). Where appropriate, tree planting should augment the amenity and appearance of the site.
6. Ensure that the standards for 'Open Space' are satisfied see Policy L4 - "Open Space Provision in New Developments" and Appendix 1).
7. Meet the parking and access requirements of the Council and provide Appropriate mitigation to minimise the impact of new development (see Policies T3 - "New Transport Infrastructure" and T5 - "Other Traffic Management and Calming Measures).
8. Not prejudice the amenity of neighbouring properties by unreasonably restricting sunlight or privacy.
9. Seek to create safe and secure environments and reduce the scope for anti-social behaviour and fear of crime.
10. Be designed to meet disability needs and include provision for disabled access within public areas.
11. Minimise the extent of light pollution caused by street and communal lighting and any flood lighting forming part of, or associated with, development.
12. Be designed to include provision for the recycling, storage, Collection and composting of waste materials.
13. Be designed to retain on-site, for use as part of the development, as much as possible of all waste material arising from construction of the development.
14. Be designed where applicable to take into account the legacy of former mining activity.

Proposed Local Development Plan

The Proposed Local Development Plan (LDP) is to be sent shortly for Examination to the Scottish Government. The LDP outlines the Council's most up to date statement of planning policy.

Policy D5

Protection of Urban Greenspace

Urban greenspace, identified on the Proposals Map, will be safeguarded. Proposals which would result in the loss of urban greenspace will be resisted unless it can be demonstrated that:

- There is no significant adverse impact on the landscape character and amenity of the site and surrounding area;
- There will be no loss of public access;
- There will be no or limited impact on nature conservation and any loss would be mitigated through enhanced provision elsewhere in the vicinity;
- The proposed loss would result in a community use, the benefit of which would outweigh the loss of urban greenspace.

Further detailed information and guidance is set out in the Green Network Supplementary Planning Guidance.

Policy D1 Detailed Guidance for all Development

Proposals for development should be well designed, sympathetic to the local area and demonstrate that the following criteria have been considered, and, where appropriate, met. In some cases, where the criteria have not been met, a written justification will be required to assist with assessment.

1. The development should not result in a significant loss of character or amenity to the surrounding area;
2. The proposal should be of a size, scale, massing and density that is in keeping with the buildings in the locality and should respect local architecture, building form, design, and materials;
3. The amenity of neighbouring properties should not be adversely affected by unreasonably restricting their sunlight or privacy. Additional guidance on this issue is available in the Daylight and Sunlight Design Guide Supplementary Planning Guidance;
4. The development should not impact adversely on landscape character or the green network, involve a significant loss of trees or other important landscape, greenspace or biodiversity features;
5. Developments should incorporate green infrastructure including access, water management, landscaping, greenspace, water management and Sustainable Urban Drainage Systems at the outset of the design process. Where appropriate, new tree or shrub planting should be incorporated using native species. The physical area of any development covered by impermeable surfaces should be kept to a minimum to assist with flood risk management. Further guidance is contained within the Green Network Supplementary Planning Guidance;
6. Development should create safe and secure environments that reduce the scope for anti-social behaviour and fear of crime;
7. Developments must be designed to meet disability needs and include provision for disabled access within public areas;
8. The Council will not accept 'backland' development, that is, development without a road frontage;
9. Parking and access requirements of the Council should be met in all development and appropriate mitigation measures should be introduced to minimise the impact of new development. Development should take account of the principles set out in 'Designing Streets';
10. Development should minimise the extent of light pollution caused by street and communal lighting and any floodlighting associated with the development;
11. Developments should include provision for the recycling, storage, collection and composting of waste materials;
12. As much as possible, all waste material arising from construction of the development should be retained on-site for use as part of the new development;
13. Where applicable, new development should take into account the legacy of former

- mining activity;
14. Development should enhance the opportunity for and access to sustainable transportation, particularly walking and cycle opportunities including cycle parking and provision of facilities such as showers/lockers, where appropriate. The Council will not support development on railways solums or other development that would remove opportunities to enhance pedestrian and cycle access unless mitigation measures have been demonstrated;
 15. The Council requires the submission of a design statement for national and major developments. Design statements must also be submitted in cases where a local development relates to a site within a conservation area or Category A listed building in line with Planning Advice Note 68: Design Statements.

GOVERNMENT GUIDANCE:

Given the size and scale of the development it is not considered that government guidance is a relevant material consideration.

REPORT OF HANDLING

Reference: 2014/0019/TP

Date Registered: 13th January 2014

Application Type: Full Planning Permission

This application is a Local Development

Ward: 2 -Barrhead
Co-ordinates: 250307/658963
Applicant/Agent: Applicant:
Mr. Jaspreet Kaur
156 Main Street
Barrhead

CONSULTATIONS/COMMENTS:

East Renfrewshire Council Environmental Health Service	No objections subject to conditions.
Barrhead Community Council	Objects to proposal as contrary to Local Plan on the grounds of increase in traffic and effect on traffic/pedestrian safety; lack of car parking; increase in noise, smells, fumes and litter; anti-social behaviour; weaken the retail function of Barrhead Town Centre.
East Renfrewshire Council Roads and Transportation Service	No objection as the proposed development is unlikely to have a notable impact on the public road network in the surrounding area and there are existing parking facilities available in the vicinity.

Odour problems
Traffic generating problems on a corner site
Incompatible with adjacent uses
Late night/early morning activity
Increase in traffic
Existing on street parking
Public health and diet concerns
Antisocial behaviour
Rights of access/private legal issues
Impact on adjacent Listed Building

DEVELOPMENT PLAN & GOVERNMENT GUIDANCE: See Appendix 1

SUPPORTING REPORTS:

No reports have been submitted for consideration as part of this application.

ASSESSMENT:

This is a local development under the terms of the Town and Country Planning (Hierarchy of Developments) (Scotland) Regulations 2009. However as more than 10 objections have been received to the application it has to be presented to the Planning Applications Committee for determination.

This application relates to premises at 156 Main Street, Barrhead which are on the corner of Main Street and Arthurlie Street within the identified town centre. The application site is part of small traditional two storey tenement block.

The ground floor unit is currently vacant having most recently operated as an estate agent office. The upper floor was formerly an office but is also similarly vacant. A well maintained back court area is indicated as being part of the site. This appears to allow access to the site and an adjacent upper floor flat but is screened from Arthurlie Street by a long single storey building. The remainder of the ground floor of the block ground is occupied by a chemists and a shop. There are a variety of uses in the surrounding area including church properties, one of which is located directly to the rear of the application site fronting Arthurlie Street.

The proposal is to change the use of the ground floor unit to form a hot food takeaway. The offices will be converted to a two bedroom flat with a lounge, kitchen and bathroom. The existing window arrangements will be retained but the former common close doorway from Main Street is proposed to be reinstated. This will afford a private separate access from Main Street to the upper floor flat. A new extract flue is shown being fitted on the rear elevation to serve the proposed takeaway. The rear court area is noted as accommodating a bin store for the proposal. The

applicant has indicated the intention to operate the hot food takeaway seven days a week from 11.00am to 11.00pm.

The proposal is required to be assessed against the development plan as well as any material planning consideration. This town centre location is covered by Policy S1 of the adopted Local Plan which indicates such areas will be the focus for new retail, leisure, community and other relevant, complementary uses. This Policy also indicates that housing above ground floor level will be supported in town centre locations. As a consequence both proposed uses are not considered alien to a town centre location. It has to be considered whether there will be amenity issues associated with the proposed development, particularly the proposed hot food takeaway and Policy DM1 is relevant in this regard. It is acknowledged that hot food takeaways could result in amenity concerns as a result of late night activity, noise, litter and cooking odours. However the proposed hot food takeaway is located in a town centre where there is a variety of uses and activity throughout the day and night. It is therefore considered that the proposed uses are acceptable at this town centre location.

The proposal to reinstate the front doorway to the close is also acceptable however the proposed doorway is actually out of scale with the character of the block and should be altered. It is considered that full details of this feature can be addressed by means of a planning condition if approved.

The material considerations in this case are the proposed Local Development Plan (LDP), National Planning Guidance, consultation responses and any third party representations.

Policies SG7 and D1 of the LDP are similar to policies above of the adopted Local Plan and as such the proposal in principle accords with these policies.

National Guidance through Scottish Planning Policy provides that town centres are a key element of the country's economic and social fabric. They are to be the focus for a mix of uses. This proposal is in general compliant with national policy.

The objections refer to a number of matters including reference to conflict with the development plan. In terms of the objections that have been submitted the following comments are made.

It should be noted that the National Policy encourages a range of uses in town centres with shopping and related complementary uses directed to established and recognised town centres. It recognises that other complementary facilities like hot food takeaways can generate noise and disturbance and acknowledges that such uses should be accommodated in existing shopping or commercial centres. This supports the view that larger established centres are more capable of absorbing the potential additional disturbance from these establishments with no significant impact on the amenity of town centre residential properties.

Attention has been drawn to Policy E1 which presumes against significant new development and changes of use not compatible with the character and amenity of the locality and its surrounding uses. The site is within a recognised town centre that has a mixture of uses. Such uses are normally expected to be found in town centres including residential uses and a range of commercial uses. It is therefore considered that the proposed development is not incompatible with its location in a town centre.

Concerns are raised that the proposed development conflicts with the aspirations Proposal Strat 4.1.1 of the adopted Local Plan. It should be noted that this Proposal refers to initiatives and programmes currently being developed in Barrhead Town Centre. It is not considered that this application presents any significant conflict with Proposal Strat 4.1.1. Indeed the justification for Strat 4.1.1 refers heavily to Policy S1 of the Local Plan which itself is noted as being aligned with both National and Strategic policy guidance.

In terms of there being too many hot food takeaways in the area the relevant policies in the local plan address the concentration or cumulative impact of such premises in terms of amenity. It is not considered that the proposed hot food takeaway will result in an excessive number of such uses within the town centre that will result in significant effects on amenity. It should also be noted

that the last use of the premises was as offices and is therefore not covered by the Local Plan policies to resist changes of uses away from retail premises.

Impacts of litter and odour from cooking can be managed and if approved suitable planning conditions can be attached. The Council's Environmental Health Service has not advised of any significant issue associated with the development. The relationship referred to between the chemists is noted but again there is no overriding planning reason to why the use as proposed cannot operate in close proximity to each other.

The Council's Road Service has not objected to the application on the grounds of parking or roads safety. Any anti-social behaviour issues are a matter for the police to address.

In terms of security impacts and access issues in respect of the use of the rear area of the site and adjacent premises these are not material planning considerations. These are private legal matters that will be required to be addressed separately by the applicant before the development can be commenced if approved.

In regard to the impact on the adjacent Listed Building, the building is a church situated at the rear and side of the application site approximately 30m away. This building is set back from Main Street and it should be noted that the proposal is for a change of use and does not involve substantial construction or demolition works. Any alterations to the site to accommodate the proposed uses are limited and are not considered to have a direct impact on the listed building or its setting.

Conclusion

The relevant local plan policies reflect national planning policy and do not preclude the proposed uses in this town centre location. It is not considered that the proposed development, in particular the hot food takeaway, would result in a concentration of similar uses that would result in significant issues that could affect amenity or result in disturbance.

RECOMMENDATION: Approve Subject to Conditions

PLANNING OBLIGATIONS: None

CONDITION(S):

1. Notwithstanding the details shown on the plans hereby approved an amended design of the new front doorway to the close shall be submitted for the written approval of the Head of Environment (Planning, Property and Regeneration) and thereafter implemented in accordance with those details.

Reason: To ensure the development is satisfactory in appearance.

2. Prior to the commencement of work on site exact details and specification of all ventilation and extraction systems to serve the hot food take away shall be submitted and approved in writing by the Head of Environment (Planning, Property and Regeneration) and thereafter shall be fully implemented prior to the commencement and use of the development.

Reason: To protect local residents from nuisance resulting from cooking odours.

3. The use hereby approved shall only be open between the hours of 11.00am and 11.00pm Monday to Sunday unless otherwise agreed in writing by the Head of Environment (Planning, Property and Regeneration).

Reason: To protect adjacent dwellinghouses from noise/disturbance.

4. Prior to the use hereby approved being brought into use details of the waste storage and management on site shall be submitted for the written approval of the Head of

Environment (Planning, Property and Regeneration). Thereafter the agreed measures shall be fully implemented on site.

Reason: To ensure that the bin stores are of a size able to accommodate East Renfrewshire's recycling facilities and are acceptable in appearance.

ADDITIONAL NOTES:

The applicant is required to consult East Renfrewshire Council Protective Services regarding compliance with the provisions of the Health & Safety at Work Etc Act 1974 and the Food Safety Act 1990.

The display of advertisements (eg fascia signs, box signs) may require to be the subject of a separate application for advertisement consent.

ADDED VALUE:

Conditions have been added that are necessary to control or enhance the development and to ensure the proposal complies with the Council's Local Plan policies.

BACKGROUND PAPERS:

Further information on background papers can be obtained from Mr Ian Walker on 0141 577 3042.

DEVELOPMENT PLAN:

Strategic Development Plan:

This proposal raises no strategic issues in terms of the Glasgow and the Clyde Valley Strategic Development Plan and therefore the East Renfrewshire Local Plan is the relevant policy document

East Renfrewshire Local Plan (Adopted 14th February 2011)

Policy S1

Town and Neighbourhood Centres

The Town and Neighbourhood Centres (as identified on the Proposals Map and listed in Schedule S1) will be the focus for new retail, leisure, community and other relevant, complementary uses. New retail (class1) development will be expected to locate in the Town and Neighbourhood Centres. Retail and appropriate non-retail proposals which help to sustain and enhance the economic and community role of Centres and otherwise accord with the policies of this Local Plan, will also be encouraged. Housing and other appropriate uses above ground floor level will also be supported. Proposals for change of use away from retail within these centres require to comply with Policy S2 - "Protecting the Retail Function of the Town and Neighbourhood Centres".

All proposals require to comply with Policies Strat2, Assessment of Development Proposals and Policy DM1 - "Detailed Guidance for all Development".

Schedule S1

Town Centres

Ref.	Location
S1.1	Barrhead

Policy DM1

Detailed Guidance for all Development

Where the principle of development is deemed to be acceptable in terms of the other Policies contained within this

Local Plan, proposals for development will require to conform to the appropriate criteria below:

1. Not result in a significant loss of character or amenity to the surrounding area.
2. Be of a size, scale and density in keeping with the buildings in the locality and respect local architecture, building form, design, and materials.
3. Not constitute backland development without a road frontage.
4. Not impact adversely on the landscape character, involve a significant loss of trees or other Important landscape, greenspace or biodiversity features (see Policies E3 - "Protection of Natural Features", E6 - "Biodiversity" L1 - "Protection of Important Urban Greenspace", and L2- "Safeguarding the Local Greenspace Resource".
5. Ensure that landscaping is an integral element in layout design, taking account of existing physical features (e.g. trees, hedgerows, walls, etc.). Where appropriate, tree planting should augment the amenity and appearance of the site.
6. Ensure that the standards for 'Open Space' are satisfied see Policy L4 - "Open Space Provision in New Developments" and Appendix 1).
7. Meet the parking and access requirements of the Council and provide Appropriate mitigation to minimise the impact of new development (see Policies T3 - "New Transport Infrastructure" and T5 - "Other Traffic Management and Calming Measures).
8. Not prejudice the amenity of neighbouring properties by unreasonably restricting sunlight or privacy.
9. Seek to create safe and secure environments and reduce the scope for anti-social behaviour and fear of crime.
10. Be designed to meet disability needs and include provision for disabled access within public areas.
11. Minimise the extent of light pollution caused by street and communal lighting and any flood lighting forming part of, or associated with, development.

12. Be designed to include provision for the recycling, storage, Collection and composting of waste materials.
13. Be designed to retain on-site, for use as part of the development, as much as possible of all waste material arising from construction of the development.
14. Be designed where applicable to take into account the legacy of former mining activity.

Proposed Local Development Plan

The Proposed Local Development Plan (LDP) is to be sent shortly for Examination to the Scottish Government. The LDP outlines the Council's most up to date statement of planning policy.

Policy SG7

Town and Neighbourhood Centre Uses

The town and neighbourhood centres, as shown on the Proposals Map and listed in Schedule 14, will be the focus for new retail (Class 1 use), leisure, community and other relevant, complementary uses in accordance with the sequential approach to site selection. Proposals will be supported where of an appropriate scale and design quality, in order to contribute to the quality of the environment and the role and function of the centre.

Proposals for change of use away from retail within these centres require to comply with Policy SG9.

Proposals for new retail (Class 1 use) and leisure development outwith the town and neighbourhood centres will be assessed against Strategic Policy 2 and the following criteria:

- A sequential approach to site selection has been followed. Proposals must demonstrate why more sequentially preferable sites have been discounted as unsuitable or unavailable;
- There will be no significant individual or cumulative adverse impact on the vitality and viability of any town and neighbourhood centre;
- The proposal will help to meet identifiable qualitative and quantitative deficiencies in existing provision; and
- The proposal is of scale which is commensurate with the size of the local community.

Policy D1

Detailed Guidance for all Development

Proposals for development should be well designed, sympathetic to the local area and demonstrate that the following criteria have been considered, and, where appropriate, met. In some cases, where the criteria have not been met, a written justification will be required to assist with assessment.

1. The development should not result in a significant loss of character or amenity to the surrounding area;
2. The proposal should be of a size, scale, massing and density that is in keeping with the buildings in the locality and should respect local architecture, building form, design, and materials;
3. The amenity of neighbouring properties should not be adversely affected by unreasonably restricting their sunlight or privacy. Additional guidance on this issue is available in the Daylight and Sunlight Design Guide Supplementary Planning Guidance;
4. The development should not impact adversely on landscape character or the green network, involve a significant loss of trees or other important landscape, greenspace or biodiversity features;
5. Developments should incorporate green infrastructure including access, water management, landscaping, greenspace, water management and Sustainable Urban Drainage Systems at the outset of the design process. Where appropriate, new tree or shrub planting should be incorporated using native species. The physical area of any development covered by impermeable surfaces should be kept to a minimum to

- assist with flood risk management. Further guidance is contained within the Green Network Supplementary Planning Guidance;
6. Development should create safe and secure environments that reduce the scope for anti-social behaviour and fear of crime;
 7. Developments must be designed to meet disability needs and include provision for disabled access within public areas;
 8. The Council will not accept 'backland' development, that is, development without a road frontage;
 9. Parking and access requirements of the Council should be met in all development and appropriate mitigation measures should be introduced to minimise the impact of new development. Development should take account of the principles set out in 'Designing Streets';
 10. Development should minimise the extent of light pollution caused by street and communal lighting and any floodlighting associated with the development;
 11. Developments should include provision for the recycling, storage, collection and composting of waste materials;
 12. As much as possible, all waste material arising from construction of the development should be retained on-site for use as part of the new development;
 13. Where applicable, new development should take into account the legacy of former mining activity;
 14. Development should enhance the opportunity for and access to sustainable transportation, particularly walking and cycle opportunities including cycle parking and provision of facilities such as showers/lockers, where appropriate. The Council will not support development on railways solums or other development that would remove opportunities to enhance pedestrian and cycle access unless mitigation measures have been demonstrated;
 15. The Council requires the submission of a design statement for national and major developments. Design statements must also be submitted in cases where a local development relates to a site within a conservation area or Category A listed building in line with Planning Advice Note 68: Design Statements.

GOVERNMENT GUIDANCE:

Scottish Planning Policy on Town Centres and Retailing indicates that town centres should be the primary focus for retail and commercial developments. Different types of retailing, which serve different purposes, should be developed in the most appropriate location. Retail and commercial developments should be focused in existing town centres before edge of town centre sites, other commercial centres or out-of-centre sites.
